

CHAOS

## CHAOS

This sculpture represents both the emotional disorder and physical destruction which is taking place within our society. The sculpture is unidentifiable. What could have been a structure symbolising order and togetherness is merely a vision of chaos.

I created 50 cubes out of cocktail sticks and a glue gun. The individual structures represent 'equality'. A reminder that we are all equal. I put all the cubes in a bag and then emptied the cubes on to the floor. The cubes fell out randomly and created this structure. I did not interfere. The process illustrates that Nature dictates our beginning, that our birth is created from a union which is out of our control, something we must accept and reflect upon but that we are equal. However, chaos can and does surround us, and mostly it is out of our control as children.

The advantage of our schooling, artwork, spoken and written words can assist us in developing our own futures independently.

This sculpture pays homage not to the Pandemic of COVID but to the Pandemic of a divisive narrative being played out upon the media and by grown ups. Who are pulling apart and dividing my Generation. They are creating division where no division exists. They are creating 'Chaos'.

The mind has been lost to the Pandemic. It is a difficult time and we have all been affected. Find peace within and Forgiveness. And lets build a future of total Equality and togetherness.
