

What would happen if black wasn't there?

What would happen if the stars weren't able to shine without the night sky?

Where would your shadow go if black wasn't there?

What would happen to all your drawings if black wasn't there?

What would happen to shading if black wasn't there?

What would you see if the colour wasn't there?

Why does it matter?

Black is black,

White is white.

Black lives matter.
